ABOUT IMMIGRATION LAWS

Immigration law has always been connected to the existence of nation states and national borders, and that, for much of human history, the question of who could lawfully cross national borders was an existential one: the inability to keep large numbers of foreigners from entering on their own terms, or to assimilate them when they do, has led to the downfall of city states and empires alike. Humans have migrated throughout history. People migrate for different reasons, such as reuniting with their families; seeking better economic opportunities; and escaping human rights abuses, including armed conflict, persecution, and torture.

An edited book under the title, "Understanding Immigration Laws: Global Issues & Challenges" will address various issues related to citizenship and naturalization, the admission and removal of immigrants and non-immigrants, and the issues of undocumented immigration and national security. Further the book is expected to analyse the impact of immigration in other areas, including employment, criminal law, family unification, international human rights law, and discrimination.

THEMES

- Evolution of Immigration Law and Policy
- Settlers, Refugees, Stateless People
